

Multi panel communication sun visor cover device

Abstract

A multi panel communication device sun visor cover. The cover comprises a multi panel device with several folds, multi-color graphic and text to convey useful information to the driving public. The exposed surfaces are folded in such a way that some are visible in the closed position and others are not. This enables some surfaces to be read with the sun visor in the closed position and others to be read in the open position. An additional surface is added for removable coupons.

Inventors: Bridwell, Gregory A. (6317 Sweetgum Lane, Nashville, TN 37221)

Claims

I claim:

1. A communication vehicle comprising:
2. A sheet of stock material (cardboard or plastic),
